storehouses (*tighremt* or *agadir*). The pattern varies considerably, however, depending upon the local environmental conditions. In the high mountains, specifically in the juniper-cedar and mountain forest life zones, where relatively low temperatures and high rainfall occur, such groups as the Seksqoua (see No. 559, map: *Tribes of Morocco*), Mesfious (594), Ait Quaouzouit (626-645), Ida ou 1, [i.e., the agricultural pattern--Analyst]

generally not sufficient to permit this elsewhere. Dwellings usually consist of one-story houses made of mud and stone, with the rooms built around a courtyard. Surrounded by cactus, they are apt to be grouped closely together to form a hamlet or even a compact village; these villages usually have communal storehouses (Adam, 1951; Domenech Lafuente, 1946, pp. 83, 90-91, 121-143; Great Britain, 1919, p. 170; Jannes, 1953, opp. p. 64; Johns Hopkins University, 1956, pp. 63-64; Joly, et al, 1949, fig. 30; Mercanton, 1954, pp. 13, 15; Montagne, 1930, pp. 46-48; 1930, particularly figs. 1, 12, 14).

South of the Ifni enclave the argan tree zone is bordered by the Saharan zone; to the east, along the foothills of the Anti-Atlas, it encounters the western-most extension of the alfa and esparto grass steppe. In both the Saharan and steppe zones the effect of increasing aridity is to still further inhibit agriculture and emphasize nomadism. The entire region is, in fact, a zone of transition from the sedentary agriculture of the Shluh to the camel nomadism of the Arabic-speaking Berber-derived Regueibat (766-767). Shluh extend as far south as the Saguia el Hamra, but in the south they are much mixed with Arabic-speaking tribes and no boundary can be drawn with any accuracy. Representative tribes include the Skoura (648), Zenaga (657), part of the Ait Imerhrane (618-645), Oulad Jellal (658-660), Ida Oublal (661), Ait Lahsen (737), Ait Oussa (745), and Beni Izarguine (747). The tribes north of the Dra are concentrated in the oases and reside in fortified villages (*ksour*). Agriculture is confined to irrigated areas along riverbanks or in the oases, and consists of the cultivation of wheat, barley, corn, olives, almonds, fruit trees, melons and vegetables; it is often carried on by members of the depressed Harratine group. Many of the tribes also own large numbers of camels, oxen, goats, sheep, horses, asses and mules, which they graze on the desert steppe to the south. As one passes from north to south Arabic speech and nomadism become more and more prominent, but the correlation is not exact. The Imerhrane, Skoura and Zenaga are all Shilha-speakers, but the Imerhrane are partly sedentary and partly nomadic, while the Skoura and Zenaga are completely sedentary. The Oulad Yahya (652), Ida Oublal, and Ait Oumribet (681) are bilingual; the first
